

ETHAN VAN DER PUTTEN

Logistics & Warehouse Operations • Diploma-Qualified in Cybersecurity • Self-Hosted Systems & Infrastructure

Mount Waverley VIC 3149 | 0493 696 018 | ethan@vtt.net.au | vtt.net.au

PROFILE

Warehouse and logistics operator with three-plus years of hands-on forklift-certified experience across manufacturing and distribution environments, paired with a Diploma of Cybersecurity (Torrens University, 2025). Recently designed, hardened, and deployed a fully containerised ERP demonstration platform end-to-end — including network access controls, custom role-based permissions, and public self-service account provisioning — to put systems administration and security skills into practice. Looking to move into a role that connects operational logistics knowledge with IT, systems administration, or security-adjacent responsibilities in a manufacturing or logistics environment.

CORE COMPETENCIES

- Logistics & Warehousing — forklift operation (3+ years), inventory control, container unpacking, FIFO stock rotation, order fulfilment, warehouse safety compliance
- Systems & Security — Linux server administration, Docker containerisation, reverse proxy & TLS configuration, role-based access control design, self-hosted application deployment
- Professional — customer service & phone-based support, team collaboration, time management, adaptability across fast-paced industries

EXPERIENCE

Storeperson — *Invetech Pty Ltd* 2026 - Present

- Manage inventory movement and stock accuracy within a manufacturing-adjacent warehouse environment
- Operate forklifts and warehouse equipment in compliance with site safety procedures

Customer Service Agent — *Aussie Broadband* Feb 2026 - Apr 2026

- Handled inbound customer support enquiries covering billing, connectivity, and account issues
- Maintained service quality and resolution turnaround across a high call volume

Machine Operator — *ContiTech Australia* Jul 2025 - Feb 2026

- Operated production machinery within a manufacturing facility to daily output and quality targets
- Followed strict safety and quality-control procedures in a regulated production environment

Warehouse Storeperson — *Aberdeen Paper Merchants* • *ACUG* • *Lucretia Group* • *Alloys* Oct 2021 - 2025

- Delivered inventory control and logistics support across multiple warehouse environments and client bases
- Advanced forklift operation, order fulfilment, and container unpacking with consistent safety compliance
- Coordinated workflow in fast-paced settings with strong attention to accurate stock recording

Sales Strategist — *KVP* • *Clean Power Co* 2016 - 2018

- Converted warm and cold leads across multiple industries through direct, face-to-face sales
- Built and managed a personal prospecting pipeline; secured appointments via high-conversion tactics

Apprentice Chef / Baker — *In2Food* • *Rustica Sourdough Bakery* 2016 - 2017, 2020 - 2021

- Applied FIFO inventory control and precision food production standards in high-volume kitchen settings
- Produced naturally leavened bread and laminated pastry lines, working in tandem with senior bakers

EDUCATION

Diploma of Cybersecurity — *Torrens University Australia* Awarded March 2025

APPLIED TECHNICAL PROJECTS

- VTT Mock Manufacturing — architected and deployed a fully containerised ERPNext instance (Docker via Coolify) modelling a working manufacturing & logistics business; implemented hardened network access controls and a custom read-only permission role for public demo access. Live at vtt.net.au
- Home Lab Infrastructure — ongoing self-hosted server environment; segregated compute resources to run local LLM (Ollama) models independently of core infrastructure

- Family Tree Application — personal software project, currently in design and planning phase
